SECUDE Continues to Raise the Bar for Secure Single Sign-on to SAP with SECUDE secure login 4.3

Released on: February 11, 2008, 10:14 pm

Press Release Author: SECUDE International AG

Industry: Software

Press Release Summary: SECUDE secure login 4.3 is the leading solution for secure Single Sign-On (SSO) to SAP® and integrates with SECUDE signon 5.9 to provide SSO for any enterprise environment. The innovative new administration console takes the complexity out of installation and allows companies to efficiently implement an enterprise-wide, risk-oriented SSO solution for SAP. This provides more value to customers and reduces maintenance costs for companies of all sizes.

Press Release Body: Lucerne, February 12, 2008 – **SECUDE secure login 4.3** is the leading solution for secure **Single Sign-On (SSO) to SAP®** and integrates with **SECUDE signon 5.9** to provide **SSO** for any enterprise environment. The innovative new administration console takes the complexity out of installation and allows companies to efficiently implement an enterprise-wide, risk-oriented **SSO solution for SAP**. This provides more value to customers and reduces maintenance costs for companies of all sizes.

The **SAP-certified software solution** is based on more than ten years experience in **Single Sign-On** and **security solutions for SAP**

and used by customers worldwide. The deep integration of **SECUDE**'s products into the **SAP** infrastructure assures easy and trouble-free installation by facilitating security and system management tasks.

Additional   features   include:
• Robust encryption of all communication in distributed environments;
• Fulfilling best practice and complying with legal data privacy requirements;
• Reducing costs from lost passwords and helpdesk calls;
• Complete Secure Single Sign-On combined with **SECUDE signon 5.9**
• Reducing the risks of dependence on specific technology or token/card vendors

One size never fits all, so **SECUDE** secure login gives companies more options for authentication mechanisms from the convenience of Windows login or Kerberos to the security of strong multifactor security of smart cards or security tokens. The solution can be easily configured for company-specific security or productivity needs without being locked in to a specific technology or token/card vendor.

"Our customers have realized the importance of having robust central administration, so we've provided it. In combination with our new **SECUDE Security Center** *for use with* **SAP NetWeaver®***, we can provide a complete Enterprise Risk Management solution with productivity gains and a clear ROI."*, explains **Peter Adams, Vice President of SAP Security.**
