

4PSA VoipNow 2 Helps Service Providers Deliver Hosted Unified Communications

Released on: March 30, 2009, 9:02 pm

Author: Rack-Soft

Industry: [Software](#)

March 30, 2009 - Rack-Soft announced today the general availability of 4PSA VoipNow 2, a Unified Communications software system that integrates a powerful IP PBX, supporting voice, video, presence, and faxing with instant messaging capabilities. The new VoipNow 2 targets Internet Telephony service providers and web hosting providers that want to increase their revenues by offering value added unified communications services to their customers.

The new version comes with more than 100 new features and benefits from the 4Grid based architecture that boosts scalability by allowing service distribution across multiple servers.

"We released VoipNow 2 GA three years after the first release of the VoipNow solution. It is the result of a long development effort that has already been awarded by the great feedback received from our beta testers during the past two months. With the new VoipNow 2 features, service providers can deliver Unified Communications services on a mature platform, designed for the hosting market. VoipNow 2 offers unmatched functionality, manageability and scalability at an affordable price.", said Bogdan Carstoiu, Rack-Soft's CEO.

Besides the redesigned architecture, VoipNow 2 also adds full T.38 support, email to fax, conference management and scheduling, one interface management for multiple VoipNow servers, developer plug-ins support, LiveMonitor, FollowMe, setup wizards, and many other new features.

4PSA VoipNow 2 is a Unified Communications platform that enables Service Providers to offer highly sophisticated Unified Communications services to businesses and individuals. 4PSA VoipNow can be deployed on standalone Linux x86 servers or on virtualized environments based on VMware or Virtuozzo. The product is also available in a free version, limited to ten phone extensions. Prices for the commercial version start from 299USD.

About

Rack-Soft

Rack-Soft develops innovative software for servers and Data Centers based on the 4Grid framework. The proprietary 4Grid technology offers the foundation for the next generation, cloud ready service delivery platforms that allow providers to deploy redundant, scalable and easy to manage SaaS infrastructures.

4PSA VoipNow is a complete Unified Communications solution that integrates voice, video, fax, and messaging with hosting services. 4PSA DNS Manager is a DNS control panel that consolidates DNS records in hosting infrastructures, delivering high availability, load balancing and automation. Rack-Soft provides a wide range of solutions for Parallels Plesk that protect servers against threats (viruses, spam, hacking), implement backup and disaster recovery, and simplify SaaS deployments.

Rack-Soft business philosophy is based on an ISO 9001 quality management system certified by TUV CERT. For more information, please visit www.4psa.com.
